EDUCATION

2020-running
TRIBHUWAN UNIVERSITY

- BSC. CSIT

SKILLS

- Linux
- Docker & Containerization
- Bash Scipting
- Cronjob
- CI/CD
- Nginx
- Git
- Golang
- System Administration
- Effective Communication
- Problem Solving

LANGUAGES

- Nepali
- English
- Tharu

PROFILE SUMMARY

DevOps enthusiast with foundation in Linux, scripting, CI/CD, and Docker. Passionate about automation and optimizing workflows to support efficient development and deployment processes.

PROJECTS DONE

Devops Projects(Self Initiated)

- Set up and managed Linux servers, including Nginx, for deploying web applications.
- Implemented SSL/TLS for secure communication between server and clients.
- Built and configured CI/CD pipelines using GitLab CI/CD for automated deployments.
- Automated tasks like backups and server maintenance using Bash scripting and cron jobs.
- Utilized Docker for containerizing React, MERN, and other technologies, ensuring seamless deployment and scalability.
- Migrated a PHP-based web application using the LEMP stack in a virtual environment.
- Explored Git and GitHub for version control and collaborative workflows.
- Gained hands-on experience with essential Linux commands for system administration and troubleshooting.
